

**Inaugural Frank J. Ferro Heart of CenterSquare Award Presented to  
Jennifer Ellis, Vice President of Investor Relations**

On December 8, 2022, CenterSquare was incredibly pleased to present the first “Frank J. Ferro Heart of CenterSquare Award” to Jennifer Ellis, Vice President of Investor Relations. This award is given in honor of our General Counsel Emeritus who passed away on Christmas Day in 2021.

Frank was a deeply loved member of the CenterSquare family for more than 17 years, providing trusted legal advice, valuable strategic guidance and endless good cheer to all who had the pleasure of working with him.

The Heart of CenterSquare award is given each year to the CenterSquare team member who carries forth Frank’s legacy and exemplifies his outstanding qualities – a commitment to excellence, generosity of time and spirit, and an infectious optimism.

Jenn joined CenterSquare in 2016 and brings the Firm’s values to life in all that she does. She is dedicated to providing unparalleled service to our clients and valued mentorship to her team, while always being accessible to offer counsel and encouragement to everyone around her. As the leader of the CenterSquare Corporate Social Responsibility Committee, Jenn has coordinated firm-wide support for a broad array of mission-driven organizations in our communities, organizing volunteers and efforts to make a difference and elicit positive outcomes for important causes.

In addition to being recognized firm-wide, each Heart of CenterSquare recipient is granted matching funds to be directed to a philanthropic cause of their choice. Jenn selected the [Love For Liam Foundation](#), an organization committed to providing comprehensive and individualized care for children with epilepsy. Our funds will go directly to the Epilepsy Neurogenetics Initiative (ENGIN) at the Children’s Hospital of Philadelphia (CHOP). There, leaders in the field of epilepsy genetics offer every child seen unparalleled access to diagnostic genetic testing, an individualized treatment plan, and enrollment in their innovative research studies.
